Data definition: The rate of placement moves per 1,000 days in foster care. Modified by Federal Government -- national target is 4.12 placement moves among children under 18 entering foster care in a 12-month period. Denominator is among children who enter foster care in a 12-month period, the total number of days these children were in foster care as of the end of the 12-month period; Numerator is among children in the denominator, the total number of placement moves during the 12-month period. The computation is the numerator times 1,000 divided by the denominator to generate a rate of removal. Source MD CHESSIE. (Removals lasting 8 days or less excluded)
