

Attachment C Performance on SSA Headline Indicators Baltimore City

# Performance on SSA Headline Indicators

## Baltimore City

Showing performance through the end of **SFY 2020, Q3**

(based on the CHESSIE 4/15/2020 extract)

Version: July 8, 2020

Date under the indicators is through end of SFY 2020, Q4

Colors will indicate if target was **achieved** or **not**.

For more information about each indicator refer to the Data Dictionary available at <https://drive.google.com/open?id=1aWUspHzMqVKD5wWJ178qTbcFAACZ6ZKIZCaO5XtY9CM>.

The Dictionary describes in detail how each indicator is defined, the children it includes, and other important notes.

Note: In small counties or for indicators in which the outcome is rare, a change in one or two children can create a large change in performance, and a large percent change, from one period to the next. In these cases, such a large change may not be cause for alarm. See the data table (last page) for the actual number of children that were included in the calculation.

If performance is not shown for a given period or indicator, it means there were no children eligible for the indicator and therefore no performance to report.

## Safety | Performance on SSA Headline Indicators | Baltimore City

### Children, youth, families, and adults are safe and free from maltreatment

Note: Victimization is defined as a report that was Indicated or Unsubstantiated. Maryland uses three report dispositions, in order of severity: Indicated, Unsubstantiated, and Ruled Out (no victim).

Most Recent 12-month Period

✓ = currently meeting target

Indicator	Cohort (Denominator)	Target	Most Recent 12-month Period		12-month periods starting every 4 months		Recent % Change (most recent year vs. 1 year ago)	Long % Change (most recent year vs. earliest year)						
			Performance	Numerator	Denominator	Jul '16-Jun '17			Oct '16-Sep '17	Jan '17-Dec '17	Apr '17-Mar '18	Jul '17-Jun '18	Oct '17-Sep '18	Jan '18-Dec '18
▲ % without another maltx after 14 days and within 12 mos from previous finding (maltx recurrence)	among children who were victims (indicated or unsubstantiated) during the 12-mo period	91 %	✓ 93 %	1,277	1,379	89 % 91 % 91 %	2%	4%						
▲ % without maltx within 12 mos from alternative response (AR) case close	among children with at least one AR case that closed during the 12-mo period	95 %	✓ 96 %	595	622	85 % 93 % 92 %	-1%	1%						
▲ % without maltx within 12 mos from family preservation (FP) case close	among children with at least one FP case (Consolidated or IFPS) that closed during the 12-mo period	93 %	✓ 96 %	2,621	2,717	96 % 95 % 96 %	0%	0%						
▲ % without maltx (and were not served in family pres) within 12 mos from assessment case close	among children with at least one Services to Families w/Children (SFC-I) case that closed during the 12-mo period	97 %	✓ 100 %	47	47	98 % 95 % 96 %	5%	2%						
▼ # of victimizations per 100,000 days in care (maltx in care)	among all days children were in care during the 12-mo period	8.5	★ 10.2	54	531,465	11.8 11.8 8.9 8.4 10.2	21%	15%						
		* NS = 9.67	9.2	48	520,160									

▲ A higher value is more desirable. We want performance to be above the target.  
▼ A lower value is more desirable. We want performance to be below the target.

■ B. City ■ Target ■ Performance is going in the wrong direction  
■ MD

\* This is a national standard (NS) set by the Children's Bureau (CB). The NS represents the national observed performance as calculated by the CB using AFCARS and NCANDS data from most states. However, the NS is based on an indicator that CB calculates slightly differently and is therefore not perfectly comparable.

## Permanency | Performance on SSA Headline Indicators | Baltimore City

### Children, youth, and adults live in safe, supportive, and stable families where they can grow and thrive

Indicator	Cohort (Denominator)	Target	Most Recent 12-month Period			12-month periods starting every 4 months								Recent % Change (most recent year vs. 1 year ago)	Long % Change (most recent year vs. earliest year)
