      a. Includes employer’s name, address and phone number
      b. Information available is generally 1 – 2 quarters behind.
   3. Provides unemployment insurance benefit information
   4. Information provided for unemployment insurance claims includes:
      a. Amount and date of each unemployment benefit issued including a payment history
      b. Liens (child support or recoupment) against the benefit to be paid
      c. Employee name, address and phone number
      d. Date of filing for benefits
      e. Last day of employment and the reason work stopped.
   5. Data is available on-line immediately upon access.

B. Motor Vehicle Administration (MVA) clearances are not required for TCA eligibility.

C. State Verification Data Exchange System (SVES) with the Social Security Administration:
   1. SVES provides:
      a. Social Security Number verification
      b. Retirement, Survivors, Disability Insurance (RSDI) benefits
      c. Supplementary Security Income (SSI) benefits
      d. Work History – Quarters of Coverage
      e. Prisoner information for individuals in federal prison.
   2. Request each type of information, required as needed for eligibility determination, separately, but consecutively without delay
3. SVES protects the integrity of customers’ information by providing an audit trail indicating who accessed the system, for what, and when.

D. Systematic Alien Verification Entitlements (SAVE)
1. Provides immigrant status verification to determine non-citizen applicant’s eligibility for public assistance
2. Required for all immigrants at application
3. SAVE supplies state agencies with information that immigrant’s sponsors provided on the original Affidavit of Support, Form I-864
4. Request for sponsor information must be made through the VIS (Verification Information System)
5. Immigrant information is verified through an internet-based system with immediate response time is https://SAVE.uscis.gov/web/vislogin.aspx

E. Public Assistance Reporting Information System (PARIS)
1. PARIS shares public assistance data among states to detect and prevent improper payments by conducting:
   a. An Interstate match, which compares participating states’ data against each other and determines if an individual is collecting benefits in more than one State
   b. A Federal match determines whether anyone receiving benefits is also collecting a salary or retirement pension as a current or former U.S. military or civil service employee.
   c. A Veterans Administration (VA) database match determines if an individual is collecting VA benefits.
2. CARES alerts-993, 994 and 995 notify case managers of a possible match.

208.4 CARES AUTOMATED MATCHES
A. State Directory of New Hires/National Directory of New Hires
1. Provides information about individuals who are newly employed
2. Depending on the employer the following information is provided:
   a. Name and social security number of the employed person
   b. Employer’s name and address
   c. First day of work
   d. Salary, pay frequency
e. Available medical benefits (employer not required to report this)
3. State match is run daily and produces alerts daily
4. National directory match is completed monthly.
5. Match is run for individuals in an active, pending, active no-pay, or Medical Assistance spend-down status

B. Income Eligibility Verification System (IEVS)
1. Provides information from the Internal Revenue Service (IRS)
   a. Assets as reported by a financial institution on a 1099
   b. Unearned income reported on a 1099
   c. Earnings reported to the Social Security Administration (SSA)
   d. Gambling winnings such as a lottery
2. Provides information from SSA:
   a. Beneficiary and Earnings Data Exchange (BENDEX) – social security benefits, private pensions, out-of-state wages, veterans and other government benefits, and self-employment
   b. State Data Exchange (SDX) – information on SSI customers
   c. Automatic verification of Social Security Number (see Social Security Number)

C. Do not use information from IEVS to determine eligibility without additional verification unless the information comes from the primary source.

D. Primary Sources for verification
1. SSA is the primary source for SSI and Social Security benefits and verification of Social Security Numbers.
   a. It may be used without other verification
   b. SSA is not the primary source for wages, self-employment, or other benefits and pensions.
      ▪ It may not be used without additional verification
2. The IRS is not the primary source for information in IEVS.
   ▪ Verify all IRS information with the primary source or other documents

Examples of a primary source:
- The employer is the primary source for wages and
- The bank is the primary source for savings accounts.
1. FIA determines when information from IEVS generates alerts to the case manager

2. Local departments are audited on procedures for security, confidentiality, and use of information
   • Information received from IEVS has strict confidentiality and security requirements
   • Access is limited.

208.5 MATCHES RUN BY THE OFFICE OF THE INSPECTOR GENERAL (OIG)

A. Matches that OIG runs against individuals and information in CARES
   1. Maryland State Employment Match - matches State employment records
   3. Public Assistance Recipient Information System (PARIS) - matches individuals on CARES receiving TCA or FS benefits with those concurrently receiving benefits in other states
      a. The number of states participating varies
      b. Match is run quarterly
      c. Individual state matches for concurrent benefits and earnings are in place with Pennsylvania, Delaware, Virginia, and DC
      d. Veterans Administration - matches veteran benefit records
   4. Maryland Department of Public Safety and Correctional Services Match - identifies individuals who are or were incarcerated while receiving benefits in Maryland.
   5. Law Enforcement Agencies – Fugitives Match –match with fugitive warrant records in Maryland and DC
