Please Note: The elevated denial percentage reported for July should be interpreted within the context of the FY26 curing period. The percentage does not represent a true cohort-based denial rate. It is calculated using applications denied during the reporting month, which may include applications received in prior months, compared with applications received during July. Because July is a curing month with lower new application volume and continued disposition of previously submitted applications, the resulting denial percentage may appear disproportionately high and should not be interpreted as the percentage of July applications that were denied.
